Profile

Founder and software builder working on financial apps and trading tools. Started coding at age 10 with Python at cyber cafes, and studied Computer Science at ESUT. Hands-on across product, backend, mobile and web. Open to partnerships, advisory and consulting.

Experience

Founder and CEO, Apaxaa Technologies Ltd

2026 to present

RC 9886261 · apaxaa.com

- **Joyet** (joyet.site, preparing for launch): an app that converts USDT, USDC, BTC and ETH deposits into a naira balance to spend on bills and transfers.
- Joyet covers electricity on 12 DisCos, airtime, data, cable TV, exam PINs and 14 betting sites, in five languages.
- Built on Flutter and Supabase, with a Postgres ledger and crypto, payout and identity providers that can be switched by flag.
- **Rael** (github.com/Apaxaa/rael, open source, MIT): a self-hostable fraud engine that returns a score, a decision and plain-language reasons for each event.

Founder, Vernsa

2026 to present

vernsa.com · In development

- Leading product and app design for a digital banking platform connecting naira accounts with stablecoins.
- Includes sending money by email or phone number. The idea began during my time as a POS attendant.

Creator, Cryptacks

2026 to present

www.cryptacks.com · Live

- Market replay simulator for testing trading strategies on real history across 70 markets, with later candles hidden.
- Models spread, commission and fills through price gaps, and uses shorter candles to settle which of a stop or target came first.
- Built with Next.js, TypeScript, Lightweight Charts and Turso, with 124 automated tests.

Co-CEO, Trednix

2021

- Helped lead the project until it was shut down.

POS attendant, then hotel staff

After secondary school

- Saw first-hand how money and transactions flow and where people get stuck. Saved for a first laptop and kept building.

Earlier projects

Web and developer tools

2020 to 2023

- **Stylet:** a CSS framework with easy-to-remember class names.
- **Awesome Editor:** a CodePen-style code editor powered by Stylet.
- **Client websites:** blogs, social platforms and data analysis sites.

pygame

Sold 2021

- A question-and-answer game, my first program, built on school computers. Sold a newer version to a friend for ₦10,000.

Skills

Financial systems	Double-entry ledgers, integer money amounts, bank payouts, crypto deposits and settlement, FX quotes
Market simulation	Candle replay, realistic fills, spread and gap modelling, futures data aggregation, multi-timeframe charts
Backend	TypeScript, Node.js, Go, Python, Django, Flask, PHP and Laravel, PostgreSQL, Prisma, SQLite and Turso, Supabase, Redis, BullMQ, Docker
Client	Flutter and Dart, React, Next.js, Angular, Tailwind CSS
AI and data	Good with AI and machine learning, working knowledge of data science, a range of self-created algorithms
Security	Working knowledge of cyber security: hashing, rate limiting, signed webhooks, idempotency keys, tiered KYC, fraud scoring

Education

Computer Science

Enugu State University of Science and Technology (ESUT)
